

# Safe and Soundless

## At the feet of knowledge

Durable cushioned feet fit on a wide range of classroom chairs.

Make sure it's Hushh-ups® or you'll hear about it!

Hushh-ups® are the safe and sensible solution to eliminating chair noise. The noise created by a single chair, just 15 decibels less than that of a jackhammer or motorcycle, significantly exceeds the volume of a teacher's voice. Noisy environments decrease a child's ability to understand speech by as much as 40 percent. For air quality safety, Hushh-ups® are inflated using AIR instead of the chemicals used in lower priced alternatives. Hushh-ups® ARE your SAFE solution!

## One Size Fits All\*

\*Standard straight leg and disc bottom chairs / desks measuring up to 1½" in diameter
